

# HIPPOS & CROCODILES

## MARABOU STORK

An expansion by  
Néstor Romeral Andrés

### INTRODUCTION

“**Marabou Stork**” is an expansion for “**Hippos & Crocodiles**” that adds a new animal to the game. The **Marabou Stork** is a large wading bird in the stork family that lives in Africa.

You need a copy of the base game in order to use this expansion. Having other expansions is also recommended.

### MATERIAL

This **expansion** includes 12 bird tiles.

### RULES

You can use this animal to play games from 2 to 4 players. For 4 players I recommend playing in pairs with the members of each pair facing each other, so the turns alternate between pairs:

Team A: Anna  
Team B: Bob  
Team A: Carl  
Team B: Diana  
... and so on.

The couple that places the last animal wins.

The Marabou Stork has an exception to placement: **Once** per game, the player can place one and only one of her tiles with the beak or feet outside the board:
