

THE HOUSE OF THE FLYING BLADES

1st Dan Expansion

By Néstor Romeral Andrés

INTRODUCTION

Ninja techniques have improved since the last skirmish. Now the dojos can use a new set of stealth movements and also a new weapon.

Also the House now has a few columns were the ninjas can hide behind.

This expansion works for any number of players (2-5).

MATERIAL

- 6 columns ('ice' discs)

- Cards:

Move in the shadows: (value=1, quantity=3) Any ninja that is orthogonally adjacent to a column or the board border can kill a prey that is also orthogonally adjacent to a column or the board border (remove the prey and place your ninja in its place as usual).

Wakizashi (two small katanas): (value=2; quantity=3) Kill two orthogonally adjacent preys at once without moving.

- Traitor: (value=2, quantity=3) Replace any ninja from any player with a ninja of your colour. The replaced ninja is discarded.

Iron Skin: (value = 2, quantity=3) Place a discarded ninja of your colour on top of another ninja of your colour. Now it becomes invincible (cannot be captured).

SETUP RULES

Before the game starts, randomly place a number of columns and ninjas per player according to this table

Players	Columns	Ninjas per player
2	6	24
3	6	25
4	4	26
5	5	26

Add the expansion cards to the deck and proceed as usual.

Columns block movement and shuriken.
